Memo to File

RE: Mineral Recovery Corp.  
John Claims  
Grand County, Utah  
ACT/019/011

On June 5, 1980 Thomas J. Suchoski of the Division's staff visited the site of the proposed John Claims with Mr. Carl Lipp, Manager Plateau Operation for Minerals Recovery Corporation. Upon visiting the site and seeing those areas that were to be disturbed by Minerals Recovery Corp. the operation was deemed to qualify as a DOE. Mr. Lipp was informed of this and he indicated that they would update their MR plan for reduction of the suffice disturbance to two acres as the roads to the site are used for recreational use and access to other mining operations farther on into that area. Also, the mine site itself will be minimal with the incorporation of a small shop on the surface and a parking facility for vehicles and storage of ore. All other facilities will be underground and no waste is proposed and if any does occur it will be consolidated in a very small area, as such the Divison Concurs with the John Claims as a DOE.
